

GLOBAL CITIZEN[®]

CORDIALLY INVITES YOU TO ATTEND

COMING CLEAN FOR CHILD HEALTH

PUTTING URBAN SANITATION AND VACCINES ON THE GLOBAL AGENDA

Please join us for a dynamic evening reception as we seek to mobilize action across the public and private sectors towards urban sanitation & vaccines.

THURSDAY, SEPTEMBER 21, 2017

6.30PM - 9PM | Tenement Museum
103 Orchard Street, New York, NY 10002

This reception will bring together prominent voices and experts in water, sanitation, and global health to celebrate the leadership of the High-level Panel of Water in working to achieve the entire scope of GLOBAL GOAL 6: clean water & sanitation, and to discuss what more needs to be done to achieve GLOBAL GOAL 3: good health & well-being.

This event in particular will focus on access to fecal sludge management and essential vaccines linking into broader issues of access to clean water and medicines. Through this cross-cutting collaboration, we are presented with a unique opportunity to come clean for child health and secure for all children a better tomorrow.
